TOP TIPS

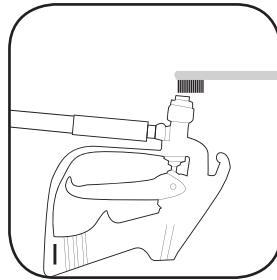

Cleaning Your Gun

You will find that, from time to time, your gun tip will build up dried adhesive which will need to be cleaned off in order to maintain an accurate spray pattern.

STEP 1

Spray the dirty gun tip with TensorGrip[®] C101 Citrus cleaner or S105 Acetone cleaner.

STEP 2

Brush off the adhesive residue using a steel brush.

The TensorGrip[®] ZAP-IT kit comes with everything you need to keep your gun in peak performance.
