Tensorgrip
Adhesives That Outperform

WHAT IS TENSORGRIP®?

As far as spray adhesives are concerned, no other product can compare to the strength, tenacity and reliability of **TensorGrip®**. Available in canisters as well as aerosols, **TensorGrip's** innovative formula breaks down barriers presented by traditional bonding methods with effortless ease.

Our adhesive systems eliminate the need to use traditional methods of bonding, that are messy, wasteful and time-consuming. Because **TensorGrip®** is a spray adhesive you are completely in control of how much glue is used, resulting in an even spray pattern the way you want it without the fuss and inconsistency that comes with using hand-applied adhesive.

Our revolutionary adhesive formulas have been proven to almost completely remove the time spent waiting for glue to tack; where traditionally you would be waiting for 25 minutes, **TensorGrip®** can tack off in as little as **ONE MINUTE!**

Not only will **TensorGrip®** speed up your workflow and drastically reduce production time, it is guaranteed to transform the way in which materials are bonded together with noticeably superior results!

OUR MARINE ADHESIVE RANGE

WHAT SIZES OF TENSORGRIP® ARE AVAILABLE?

Aerosol

Volume: 500ml

This convenient 500ml aerosol is perfect for small applications or for less-frequent users. Small but sticks all the same!

Canister

Volume: 13L/22L

Our most popular adhesive container; comes equipped with a gun and hose system for fast and accurate dispersal. A long-lasting and cost-effective solution available in a 13 or 22 litre canister.

Intermediate

Volume: 110L

The largest in our range, suitable mostly for use in large-scale production environments.

THE NEW TENSOR LABELLING SYSTEM

Choosing the product that is right for the job should never have to be a hassle, so we at Tensor have developed a new labelling system to help make your choosing of the correct adhesive as quick and easy as possible! Each of our aerosol, canister and intermediate labels have been colour coded to fit specifically into the market of which they apply to most and now feature icons that depict which applications the adhesive is best suited for. The following applications are carried out to the greatest effect with our MARINE range:

Boat Hull

Seating

Ceilings/Headliners

OUR MARINE ADHESIVE RANGE

M35

Vinyl Hi-Temp
Spray Adhesive

Our Marine range's **HIGH PERFORMANCE** plasticiser resistant adhesive.

TensorGrip® M35 is a highly engineered adhesive based on industry proven urethane technology. The resilience of this technology provides ultra-high temperature resistance up to 169°C and resists against plasticiser migration, being the two main causes of delamination in the marine industry. The M35 adhesive gives the user peace of mind knowing that the final bonded result will be successful across the applications, the adhesive is designed for.

Advantages:

- 100% resistant to delamination caused by plasticiser migration.
- Ultra high temperature resistance – up to 169°C.
- Good green strength.
- Offers a level of repositionability for dash board vinyl construction.
- Consistent web spray pattern.
- Will bond all decorative fabrics, foams, vinyls and laminates.
- Creates a structural type bond line.

Substrates:

Properties:

Available in:

OUR MARINE ADHESIVE RANGE

M01

Plasticiser Resistant Vinyl Spray Adhesive

TensorGrip® M01 is a polyurethane foam bead adhesive, developed to bond large format polystyrene blocks during the Plug building process prior to infusion mould production. M01 has incredible bonding characteristics on polystyrene and MDF/Ply substrates. The excellent properties of the M01 allow for the large format polystyrene blocks to be moved into position whilst the adhesive is not fully cured; after 10-15 minutes the blocks become solidly bonded. TensorGrip® M01 works very well in conjunction with the M75 featured in this brochure.

Advantages:

- Full finger trigger movement.
- Ultra-fast application.

Substrates:

Properties:

Available in:

M30

Infusion RTM Mould Spray Adhesive

TensorGrip® M30 – designed for the Marine infusion mould market, this product is a high performance, solvent-based polymer adhesive in a pressurised canister delivery system. The M30 is specifically designed to hold reinforcing fibres in place during the infusion process of the resin without affecting the surface finish or structural integrity.

Substrates:

Properties:

Available in:

Advantages:

- Used for Infusion/Vacuum Forming composites.
- Safely fuses laminating materials to structural core surfaces.
- Provides superior holding during forming process.
- Allows resin to obtain maximum tensile shear strength.

OUR MARINE ADHESIVE RANGE

M32

Ultra Fine Mist Peel Ply Adhesive

TensorGrip® M32 was developed as a result of the market requesting a super fine mist spray product, with high tack and no airborne droplets of adhesive - the M32 gives exactly that! This product gives excellent results when bonding ultra-thin glass mat or peel-ply eliminating any read through into the finished infused article.

Advantages:

- Ultra fine mist spray.
- No airborne adhesive particles.

Substrates:

Properties:

Available in:

M50

Fast Dry Pressure Sensitive Adhesive

TensorGrip® M50 is a fast dry, non-chlorinated adhesive designed for all types of upholstery, seating and wall coverings for boat/yacht interior applications in the Marine industry. M50 has been developed with an exceptional high tack and long open time making it suitable for bonding a variety of materials including carpet, foams and fabrics and many others. M50's aggressive high tack allows for single-sided bonding in low demand upholstery seating areas for seat backs and bases.

Advantages:

- Extremely high-tack.
- Very fast-drying.
- Non chlorinated.
- Excellent green strength.
- Long open time between bonds.

Substrates:

Properties:

Available in:

OUR MARINE ADHESIVE RANGE

M55

Super Web Infusion RTM Spray Adhesive

TensorGrip® M55 is a super tacky, heavy mat spray adhesive. Designed to give ultimate grab and performance with minimal adhesive application, for demanding and deep crevice applications. If you have a problem with the latest heavy mats and hull infusion in and around the bow area, the **M55** is the answer!

Advantages:

- Super high tack.
- Ultra high grab.
- Minimal adhesive application.

Substrates:

Properties:

Available in:

M60

Ultra Low Profile Spray Adhesive

TensorGrip® M60 is a pebble-mist spray contact adhesive, designed to give a perfect, smooth finish when bonding gloss laminates or paperback veneers in the Marine industry for bespoke furniture applications. Bonding with a variety of the finest materials used in high-end yachts, this high performance mist spray is suitable for post-forming and will give a flawless, smooth finish on the thinnest decorative materials.

Advantages:

- Pebble mist spray adhesive.
- Ultra smooth finish on thin decorative finish materials.
- Suitable for post forming.

Kick Off

TensorGrip

WE'LL SET YOU UP WITH **TensorGrip®** FOR FREE!

Using **TensorGrip®** is more than simply using an adhesive canister; it is having everything that you need to create that unbeatable bond in as simple a fashion as possible. Inside this box lies the key to reaching the optimum potential of **TensorGrip®**, bringing your work to new heights of quality and efficiency, all the while incurring absolutely no additional cost to your first canister purchase*. We are proud to introduce the **TensorGrip® Kick Off Kit**. This unique package comes with all of the essential tools for bonding, including a Professional Spray Gun, Hose, Gun Tip, Roller and a **Tensor**-branded Ball. Everything to ensure that you are getting the very best out of our adhesives!

OUR MARINE ADHESIVE RANGE

M75

Polystyrene Adhesive

TensorGrip® M75 is a high performance, pressure sensitive, polystyrene compatible adhesive. The M75 is developed to work in conjunction with the M01 or as a stand-alone product. The incredible tack and compatibility with polystyrene makes this product the perfect partner when bonding blocks of polystyrene together or to the sub-deck. If using this product in conjunction with M01, it can be applied to the face ends of the large format blocks.

Advantages:

- Fast, high tack
- High solids.
- Polystyrene and EPS compatible.

Substrates:

Properties:

Available in:

M81

High Temperature Resistant Laminate Spray Adhesive

TensorGrip® M81 is a high performance contact adhesive which creates a tough resilient bond line between decorative laminate materials and wood substrates in the Marine Industry. TensorGrip® M81 is designed for permanent bonding where immediate bond strength and high heat resistance are required.

Advantages:

- High temperature resistance – 120°C.
- Fine web-spray adhesive.

Substrates:

Properties:

Available in:

OUR MARINE ADHESIVE RANGE

M82

Mould Deck High Grab Spray Adhesive

TensorGrip® M82 is a fast drying contact adhesive with good heat resistance. It is suitable for bonding a variety of materials to sheet timber, metal and some hard plastics. Immediate permanent bonds can be achieved by double-sided applications on most substrates. Its tacky pressure-sensitive properties make it ideal for foam, fabrics, duct liner and wrap, some hard plastics and many other porous and non-porous substrates.

Advantages:

- Incredible Grab.
- Good Heat Resistance.
- High Solids.
- Easy Application Control.
- Versatile.
- Economic.

Substrates:

Properties:

Available in:

M84

High Tack Multi-Purpose Spray Adhesive

TensorGrip® M84 is a high tack spray adhesive developed for bonding carpet and thick fabric applications for interior trim and re-trim in the Marine Industry. Its super-high tack, pressure sensitive properties makes it ideal for applying materials in overhead and vertical operations.

Advantages:

- Super high tack.
- Fast drying with good open time.
- Excellent bond adhesion for fabrics, carpets and foam materials.

Substrates:

Properties:

Available in:

OUR ADHESIVE CLEANER RANGE

C101

Citrus Adhesive Cleaner

TensorGrip® C101 Citrus Cleaner is a biodegradable, citrus solvent cleaner, degreaser and adhesive remover. It can be used safely on most surfaces and substrates, including painted surfaces, glass, porcelain, concrete, and is compatible with many plastics and vinyls.

Advantages:

- Biodegradable.
- Compatible with most plastics.
- Citrus scent.
- Increased productivity.
- Minimises waste.
- Minimises equipment set-up & clean-up.
- Completely portable.

S105

Acetone Cleaner

TensorGrip® S105 Acetone Cleaner is a solvent cleaner, hose flush and has been specifically designed for use with TensorGrip® PU canister products as a Hose & Spray Gun Flushing System. It can be used safely on most canister spray equipment and is a strong solvent (will not remove dried/cured PU products). This product can be used safely on most surfaces and substrates including painted surfaces, glass, porcelain, concrete, and is compatible with many plastics and vinyls.

Advantages:

- Efficient clean-up & maintenance.
- Compatible with most adhesives.
- Compatible with most plastics.

Sticky[®] points

THE ADHESIVE LOYALTY SCHEME

Receive **FREE** Tensor[®] products when you sign up to the **Sticky Points Loyalty Programme!**

Register for free and start earning **Sticky Points[®]** straight away! Simply buy **Tensor[®]** products from your usual distributor and enter your unique code online to earn **Sticky Points[®]**. These points can be exchanged for a range of **Tensor[®]** products, such as a 22L canister, a roller or spray gun, or even a football! Better still, we'll send your reward to you **FREE OF CHARGE!**

Why not check the canister you are currently using for a **Sticky Points[®]** label?

HERE'S HOW IT WORKS

1. Register your details
2. Find the code on your **Tensor[®]** product
3. Access your account
4. Enter your code
5. Watch your points balance grow
6. Redeem!

When you have collected enough points, **REDEEM** those points for your favourite product and we'll send it to you **FREE OF CHARGE!**

Scan here and register
to start collecting
Sticky Points now!
