Adhesives That Outperform

M50I BACKPACK

The answer to ultimate portability for MINI Canisters!

Tensor[™]
Adhesives That Outperform

TensorGrip[®] M501 Backpack

When you're out in the field or facing a gluing job that requires a lot of moving around, it's not ideal to have to deal with a bulky canister that can be difficult to haul around. That's when the TensorGrip[®] M501 Backpack comes in handy. Currently available for mini (7L) canisters.

Another innovation unique to Tensor[™], inspired by customer input.

- Perfect solution for field jobs (i.e. fiberglass layup in boat hulls, laying flooring, rooftop work)
- Takes the strain off your arms
- Light enough that it doesn't cause back strain
- Eliminates bending over
- Eliminates dealing with hoses and canisters
