## OUR REEFER REPAIR ADHESIVE RANGE

# 1. SPRAY

After attaching the gun and hose to the canister, simply spray the wall foam & interior liner (e.g. Kemlite, Polar X, PunctureGuard, Versitex) with TensorGrip® EP0-CAL adhesive.

That quick. That easy. Even a new hire could get it right.

# 2. POSITION

When the adhesive is dry to the touch, you'll need between 3 and 10 people to work as a team and get the liner on the wall.

The liner is not going to fall on you when you're putting it on the wall! Once it's on, it isn't going anywhere.

No wasted time bracing the wall up and waiting for glue to cure.

# 3. ROLL

Get the maximum strength out of the repair with the EP0 Roller. Just push hard & roll the entire repaired wall. This is what makes the repair so strong & successful.

By now you'll know whether this makes sense for you. Let's make it work in your shop!
